

Mind Your P's & I's

WATCH OUT! 4Farmers has gone crazy with prices on several products that coincidentally start with P or I.

Propyzamide 500

Price has increased a little on Propyzamide 500 SC but the cheapest price is still only **\$21/litre** in 1000L containers. Granules are only **\$430/20kg**. Be quick before stocks run out!

Great prices are still available this month on Paraquat, Propyzamide, Imazapic, Imazethapyr and Imidacloprid. All have big savings on past prices and bring themselves into greater contention for being used more widely." Neil Mortimore, 4Farmers GM.

Paraquat 250

4Farmers has really set the pace with an incredibly good price as low as **\$3.60/litre**. When Paraquat is cheaper than Glyphosate it's a good time to perhaps consider giving Glyphosate a break and use Paraquat instead. A special price of **\$7.60/litre** is available this week for Brown Out, a product similar to Spray.Seed®, if this is your preferred knockdown.

Imazapic 240

Product similar to Flame®. At **\$39/litre** it is believed to be less than 25% of what the trade name product has been recently selling for. Imazapic 240 is not registered for Clearfield crops but is one of the ingredients in chemicals that are. We hope in future we can develop some label registrations for Clearfield crops.

Imazethapyr 700

Product similar to Spinnaker®. Typically used in peas and other legume crops for control of various grasses and broadleaf weeds. 4Farmers special introductory price of **\$100/kg** is over one-third that of the similar products currently available.

Imidacloprid 600

A seed dressing product similar to Gaucho® or Emerge® to control mainly aphids in cereals and Canola. A product farmers to date have complained too expensive to use is now available for only **\$22/litre** or around **\$3/ha at its higher rate!** GRDC trial has shown average returns can be more than \$40/ha.
