

Brown Out (Paraquat + Diquat) June Special \$7920/1000L (inc GST)

Here's a bargain for June purchase. 4Farmers Brown Out (similar to SpraySeed®) for \$7920/1000L, or \$7.20/L exGST. However this is a run out on existing stock only so get your orders in quick.

For smaller farmers we have a special on Paraquat 250 \$85.80/20L inc.GST. (\$3.90/l ex GST). Stocks of this also very limited.

4Farmers have cheap broadleaf covered with LVE MCPA & Diflufenican

4FARMERS now have available a mixture of LVE MCPA 250 + Diflufenican 25 registered (similar to Tigrex®). Indicatively the cost for this product is \$11/L and 4Farmers is likely to beat any quote. Please bear in mind cheap stocks might be limited until early July.

To buy the products in this mix individually is still significantly cheaper. When Diflufenican is less than \$40/litre and LVE MCPA indicatively \$8.50 to mix up a litre of product with similar amount of active to the above costs around \$6/litre.

It is true the pre mixture has better efficacy then mixing the products individually. Farmers need to weigh up for themselves the difference in efficacy between the two alternatives and the convenience of the pre-mix to make their decision.

Bromoxynil has also fallen again in price this year and become relatively cheap. Mixed with Diflufenican this is a great option for those wanting to spray earlier from the 2 leaf stage onwards and/or rotate away from phenoxy herbicides they may have resistance issues.

Grass Selectives – Haloxyfop rather than QPE?

HALOXYFOP (similar to Verdict®) kills grasses in pastures and legumes like QPE (Quizalofop, similar to Targa®). However for very little extra Haloxyfop also has the added benefit of controlling Geranium as well.

Talk to 4Farmers about the cheap prices on both these chemicals and carefully consider your choice.

More good news is Clethodim has also dropped in price this year. Talk to 4Farmers for your requirements.

Want an alternative to Flame®. 4Farmers has cheap stocks of Imazapic 240
