

## 4Farmers "Must Stop" site at Field Day

THERE are many reasons 4Farmers is a "must stop" site at all the field days Dowerin, Newdegate and Mingenew. Besides all clients being welcome for a sit down, coffee and chat, other reasons all farmers to stop in are;

1. The best deals on all chemicals. Including Glyphosate, Trifluralin, Paraquat, grass selectives and fungicides.
2. Discuss what the future is for Diuron and other chemicals under APVMA review.
3. Learn about Trifluralin and other poor quality products to avoid.
4. Learn about our new registrations including Glyphosate 500 that is similar to PowerMAX® with the same glyphosate salt.
5. New products in spray nozzle technology.
6. How people currently using 110s and 20s drums can save.
7. See a new invention for handling 1000L IBCs without a forklift.
8. Put your order in for free 2012 chemical book.
9. Collect your free advance edition of 4Front newsletter.

So many reasons you must stop at 4Farmers at your field day.

*"I personally welcome every farmer to meet us at our site. There is definitely something of interest for everyone",  
Phil Paterson, 4Farmers MD.*

## Unbeatable Haloxypop and other Grass Sprays

Weather your choice is Clethodim, QPE or Haloxypop we challenge you to buy better than 4Farmers.

Especially Haloxypop which for spaying pastures is generally the choice product because of its ability to take out Erodium as well as most grasses.

None of these grass sprays have ever been cheaper. Get your requirements from 4Farmers now.

## 110's and 20's a costly luxury

FARMERS normally buying 110L or 20L drums should consider buying their product in larger size containers. This can often save between \$0.50 to \$1/L or \$10-\$20/20L which is quiet significant for a little bit of effort.

200L drums from 4Farmers are generally opaque with graduations to make handling a little easier.

Even better, for the greatest saving switch to 1000L drums. A new invention on display at 4Farmers at Dowerin means farmers can handle the bigger containers without the need for a forklift or tractor!

Farmers should also be aware micro matics are available for 200s and 1000s if this is an issue too.

## New 4Farmers Glyphosate like PowerMAX®

4FARMERS new Glyphosate 500 has the same salt as PowerMAX® and with the addition of suitable additives our trials show it will have similar performance.

Even better news is Glyphosate 500 is being sold at our budget price.

4Farmers Glyphosate 470 continues to be our premium Glyphosate product with 15% surfactant. Besides the convenience of inbuilt surfactant it is also easier pouring.

Another alternative is 4Farmers Glyphosate 875 which gram for gram of active does perform better than any other Glyphosate. Not to mention the convenience of being in 20kg boxes doing away with drums. Currently this product is also at a special price.
