

“ With some rain at last hopefully many are busy with seeding. So here are a few short messages from 4Farmers.

The big news is that we now have **4Farmers Omethoate 290** to tackle RLEM and provide residual control. Omethoate also offers control on Lucerne Flea and Bryobia Mite. Don't buy elsewhere until you check 4Farmers price! ”

**Neil Mortimore, GM**

“ Feedback for **4Farmers Glyphosate 875 WDG** has been excellent. Prove it for yourself this season with at least one box before you make the logical move to granules next year. ”

**Keith D'Costa, Senior Chemist**

“ **4Farmers Triadimefon 500 Dry** is still available, it's cheap and so easy to apply to your fertiliser. Get some on to control diseases including Rust, Septoria, Take-all and Powdery Mildew. ”

**John Miles, Chemist**

“ Ryegrass resistance to Trifluralin is on the increase. Keep on top of it and give pre-emergent ryegrass control a boost with **4Farmers Metolachlor 720**. Special June prices make Trifluralin + Metolachlor strategies even more attractive. ”

**Cindy Pan, Supply Manager**

“ 4Farmers have plenty of post emergent spraying options. The control of broadleaves include **Diuron 900 WDG, LVE MCPA 500, MCPA Amine 500, 24D Amine 625** and **Diflufenican 500**. We will also have both **24D Ester 600** and **24D Ester 800** available again soon. For post-emergent grass control, 4Farmers also has **QPE, Clethodim** and **Haloxyfop**, as well as **Diclofop Methyl** and **Tralkoxydim** for grass control in cereals. ”

**Rachel Allwork, Distribution Officer.**

“ There is a lot of paddocks probably dry sown coming up very weedy. A knockdown with **4Farmers Paraquat** could work very well in this situation and take a lot of pressure off post emergent sprays. Talk to me first and about other potential niches for paraquat. ”

**Terry Piper, Agronomist**
