Paraquat Cheaper than Glyphosate!

Paraquat or Brown Out are bargains at these price. Think about them instead of Glyphosate, Neil Mortimore 4Farmers GM

PARAQUAT at prices as low as **\$3.60/L ex GST** means its cheaper than some Glyphosate prices.

There has never been a better time to consider rotating to Paraquat as an alternative knock down if weeds are small. Resistance to Glyphosate is very serious but unfortunately the reality for some farmers. Protect Glyphosate and increase its longevity. At very least farmers consider using Paraquat in a double knock strategy in tandem with Glyphosate.

4Farmers also has BrownOut (Paraquat & Diquat mix like Spray.Seed®) at low prices too.

Plenty of Trifluralin

Despite rumours otherwise 4Farmers don't foresee any supply issues with Trifluralin.

4Farmers is receiving enough Trifluralin to cover all back orders and more. The last of it might well be delivered in late April but certainly comfortable in time for most peoples seeding program.

400% Saving on Chemical Product

4Farmers has established a reputation as the go to place to buy the widest range of top quality chemicals at the best prices.

4Farmers continues to reinforce this reputation by slashing the price on chemicals like Imazpic 240 (like Flame®) and saving approximately 400% of the new price.

Another product is Imidacloprid 600 SC (like Gaucho®) with savings 175% of the new price.

For many people this is arguably the most important year to be shopping around to save on their chemicals.

Contact your nearest 4Farmers distributor now or call head office on 1800 038 445.
