

Barley Grass suppression with Pendimethalin a useful bonus

4FARMERS trials have shown that applied at the same rates of active per hectare, both Pendimethalin and Trifluralin can give similar pre emergent control of Ryegrass for only a small difference in cost.

An advantage of Pendimethalin is its lower volatility allowing extended incorporation time after application.

BARLEY GRASS

Another bonus of Pendimethalin is its useful suppression of Barley Grass demonstrated by the visual response in one 4Farmers trial in 2019, as well farmer experience.

Mukinbudin farmer Denis Palm has been using Pendimethalin for over 20 years.

"I've always preferred Pendimethalin instead of Trifluralin

where Barley Grass is an issue," he said.

"The results were best in moist conditions.

"Sulfosulfuron can control Barley Grass but increasing B group resistance is a concern.

"Using it in combination with Pendimethalin makes sense for resistance management."

For less than \$2/ha more than Trifluralin, there has never been a better time to trial Pendimethalin.

Contact 4Farmers now to discuss your pre-emergent Ryegrass control strategies with Pendimethalin, Trifluralin and Prosulfocarb, and secure the best value stock available.

Suppression of Barley Grass in 2019 4Farmers trial at Meckering.

RIGHT: Trifluralin 480 2L/ha + Prosulfocarb 2L/ha.

Get better value on your next chemical order

NEW 4Farmers sales manager Peter Dixon is looking forward to meeting more farmers across WA and providing access to 4Farmers products that they may previously not have had available to them.

"A lot of farmers in WA that don't have access to a local 4Farmers distributor are missing out on the opportunity to source great value, top quality chemical from 4Farmers," Peter said.

"4Farmers has built a reputation on supplying excellent quality, competitively priced chemicals to Western Australian farmers for the past 25 years and I look forward to the opportunity to introduce growers to our great range of products.

"I encourage farmers to give me a call at any time to discuss their coming season's chemical requirements.

"4Farmers has transport available and can deliver on farm anywhere in WA."

■ Peter can be contacted at any time on 0439 001 002 or via email at peter@4Farmers.com.au
