

Wetter 1000

Similar to: BS 1000® and others.

Active Constituent	Non-ionic Alcohol Ethoxylate 1000g/L		Formulation	EC
Adjuvant Group	Surfactant			
Price ex GST	\$4.80/L	Typical Pack Size	20L, 110L, 1000L	
Poison Schedule	N/A	Dangerous Goods Class	-	UN - Packing Code -
Use	Wetter 1000 is a non-ionic wetting agent which provides the following qualities: - Wetting; assists spray droplet spread and adherence.			
Compatibility	Compatible with a range of herbicides, fungicides and insecticides which recommend the addition of non-ionic wetting agents (refer to product labels).			
Water Quality	Saline and hard water can reduce efficacy (increased rates may assist).			
Similar Products				
Situation	Purpose	Rate	Comments	
Agricultural chemical application	Enhances the wetting and spreading of selective and non-selective foliar applied herbicides, and enhances the efficacy of Paraquat and Diquat on grass weeds	25-100ml/100L water	Use higher rates on hard to wet weeds (waxy or hairy surfaces). Refer to individual herbicide product labels.	
Horticultural chemical application	Enhances the wetting and spreading of insecticides, fungicides and growth promoters	40-100ml/100L water	Refer to individual herbicide product labels.	
Dust suppression, Water additive (e.g. Fire Fighting)	Enhances water coverage, suppression and control	40-100ml/100L water	Use higher rates where greater spread is required.	
Comments				
Non-ionic surfactants are less likely to cause damage to leaf protective coatings on crops, therefore can offer a safer alternative to crop oils. Wetter 1000 can assist in overcoming tank-mix compatibility issues when added at 0.1% total spray volume rates.
