

## Carbendazim 500 SC

Similar to: *Bavistin FL*® and *Spin Flo*®

|  |   |                              |   |                                   |
|--|---|------------------------------|---|-----------------------------------|
| <b>Active Constituent</b>  | Carbendazim 500g/L  |                              | <b>Formulation</b>  | SC                                |
| <b>Typical Situations</b>  | Chickpeas, faba beans, lentils, vetch and macadamia (see registration section).   |                              |   |                                   |
| <b>Diseases Controlled</b>   | Chocolate Spot, Grey Mould and Macadamia Husk Spot.   |                              |   |                                   |
| <b>Chemical Group</b>  | 1   | <b>Mode of Action</b>        | Upwardly systemic in plant – provides protectant and curative activity. |                                   |
| <b>Price ex GST</b>  | \$15.00/L   | <b>Typical Pack Size</b>     | 20L   |                                   |
| <b>Poison Schedule</b>   | 7   | <b>Dangerous Goods Class</b> | -   | <b>UN</b> - <b>Packing Code</b> - |
| <b>Withholding Period</b>  | <b>Harvest</b> Do not harvest for 4 weeks post application (14 days for macadamia).<br><b>Grazing</b> Do not graze or cut for stock food for 4 weeks post application.  |                              |   |                                   |
| <b>Application Method</b>  | Boom spray 100L/ha  |                              | <b>Rain fastness</b>  | 3 hours                           |
| <b>Efficacy</b>  | Apply at recommended timing for specific situation, ideally in fine weather, ensuring thorough canopy penetration and foliage coverage to maximise efficacy. Fungicidal activity only occurs within treated foliage – new foliage is not protected. |                              |   |                                   |
| <b>Adjuvants</b>   | Use Wetter 1000 (non-ionic adjuvant) to ensure optimum coverage on hard to wet plants.  |                              |   |                                   |
| <b>Compatibility</b>   | Most fungicides and insecticides.   |                              |   |                                   |
| <b>Incompatibility</b>   | N/A   |                              |   |                                   |
| <b>Water Quality</b>   | N/A   |                              |   |                                   |
| <b>4F Broadacre Registrations</b>  | Chickpeas, faba beans, lentils and vetch.   |                              |   |                                   |
| <b>4F Other Registrations</b>  | Macadamia.  |                              |   |                                   |
| <b>Similar Product Registrations</b>   | <i>Bavistin FL</i> ® is registered for use on various orchard, horticultural and irrigated crops, pasture and turf. <i>Spin Flo</i> ® as above.   |                              |   |                                   |
| <b>Situation</b>   | <b>Target Disease/s</b>   | <b>Rate/ha</b>               | <b>Comments</b>   |                                   |
| Chick Peas, Faba Beans, Lentils, Vetch   | Chocolate Spot, Grey Mould  | 500mL                        | Apply 2 treatments at 14 day intervals.                                 |                                   |
| Macadamia Nuts   | Macadamia Husk Spot   | 50mL + 100mL/100L Wetter     | Apply 5-8 weeks post main flowering. Remove fallen nuts from ground.    |                                   |
| <b>Comments</b>  |   |                              |   |                                   |
| <p><b>Do not</b> enter treated sites until solution has dried (glasshouses require ventilation also).</p> <p><b>Do not</b> exceed 2 applications per crop.</p> <p>Contents will settle over time, agitate regularly if stored, and ensure constant agitation while mixing and applying. Check produce/livestock MRL's prior to application if intended for sale/exporting.</p> <p>Low toxicity to bees, however aquatic life is extremely sensitive; toxicity will last for extended periods of time if waterways are contaminated.</p> <p>S7 product - <b>TOXIC</b></p> |   |                              |   |                                   |
