

Patience required for some chemical supplies

CORONA Virus is a major disruption to smooth supply that overlays other supply issues that were going to exist anyway.

The good news is timely chemical supply is expected, but maybe not as early as we would prefer.

At present many key products like liquid Glyphosate, Trifluralin and Prosulfocarb can be ordered now but new stocks are not able to be supplied until April.

Many Chinese chemical factories haven't stopped production, they have just slowed their production due to less staff numbers.

Shipping logistics have also become more difficult.

Our formulation plant will be very

busy over the next couple of months as well as our trucks doing deliveries.

NOT ALL PRODUCTS SHORT

The other good news 4Farmers has a lot of stock on hand of many different products.

For example we have good supplies of products including Glyphosate 875 WG, Triallate, Flutriafol, Ester 680, Triclopyr, Chlorpyrifos, Amm Sul and Take Up all ready for prompt delivery.

There is no need to panic about supply yet.

Some key products maybe just in time but there are many other things we can supply immediately.

Talk to the 4Farmers team for more advice on you particular situation.

Don't overlook Flutriafol

FARMERS that have balked on Flutriafol should carefully weigh up their alternatives.

The price of Flutriafol has come down slightly this year.

Farmers need to carefully define what their target diseases are before spending a lot of unnecessary dollars on other higher cost alternatives.

GREAT COMPATIBILITY

4Farmers Flutriafol 500 has been proved to have good compatibility when mixing with various products in the lab.

"We benchmarked 4Farmers product in our lab against others and found is at least as good as the next best product for compatibility," says 4Farmers chemist Jonathan Wihardjo.

"Even mixing neat 4Farmers Flutriafol with Flexi-N still worked satisfactorily.

Though to make the mix more robust we suggest Flutriafol should be diluted with water".

4Farmers improved Flutriafol formulations has got good compatibility
