

# Metalaxyl-M 350

Similar to: *Apron XL*®

<b>Active Constituent</b>	Metalaxyl-M 350g/L		<b>Formulation</b>	ES
<b>Typical Seed</b>	Chickpeas, Lucerne, Peas, Subterranean Clover and other horticultural and irrigated crops (see registration section).			
<b>Pests Controlled</b>	Damping-Off, Phytophthora Root Rot, Phytophthora Stem Rot, Fusarium Wilt Disinfection and Downy Mildew.			
<b>Chemical Group</b>	4 Fungicide	<b>Mode of Action</b>	Root uptake, upwardly systemic in plants, protectant, curative and eradivative activity on fungi.	
<b>Price ex GST</b>	\$130.60/L	<b>Typical Pack Size</b>	5L	
<b>Poison Schedule</b>	5	<b>Dangerous Goods Class</b>	-	<b>UN</b> - <b>Packing Code</b> -
<b>Withholding Period</b>	<b>Harvest</b>	Not required when used as directed.		
	<b>Grazing</b>	Not required when used as directed.		
<b>Application/Efficacy</b>	Apply diluted with water before sowing.			
<b>Treated Grain Storage Life</b>	Treated Lucerne seed can be stored up to 18 months, Chickpea, Pea and Subterranean Clover seed must be used within 6 months. The prepared solution must be applied to seed within 1 week.			
<b>Compatibility</b>	-			
<b>Incompatibility</b>	-			
<b>4F Broadacre Registrations</b>	Chickpeas, Lucerne, Peas, Subterranean Clover (extract listed).			
<b>4F Other Registrations</b>	Cotton, Lucerne, Maize and other horticultural and irrigated crops (see label).			
<b>Similar Product Registrations</b>	Contains the same active ingredient as Uniform® and many other seed dressing products.			
<b>Situation</b>	<b>Target Pest/Disease</b>	<b>Rate/1t seed</b>	<b>Comments</b>	
Chickpeas	Phytophthora Root Rot	0.75L	Apply diluted with water before sowing. Do not store treated seed for more than 6 months before sowing.	
Lucerne	Damping-off	1L	See above. Treated Lucerne seed can be stored for up to 18 months under ideal conditions.	
Peas		0.75L	See above. Do not store treated seed for more than 6 months before sowing.	
Subterranean Clover		1L	See above. Do not store treated seed for more than 6 months before sowing.	
<b>Comments</b>				
Metalaxyl-M chemistry is particularly active against Downy Mildew, and <i>Pythium</i> and <i>Phytophthora</i> pathogen species which cause Damping-off disease.				
4Farmers trial data demonstrates that the use of Metalaxyl-M by itself may provide good control of Rhizoctonia and Crown rot in cereals.
